Information about the internship for students focusing on international business

Students are expected to take part in an internship for reaching the international Abitur Baden-Württemberg.

Requirements for the participating companies:

It is possible to conduct ones internship in a private company as well as in non-governmental organisations or cultural institutions.

It is very important that the internship of the participating company does have an international focus.

If it is an organisation abroad, the international focus is therefore automatically achieved.

If it is an organisation in Germany, students should be employed in departments with strong international ties. For this to occur the participating companies could be part of the transportation industry or have a trading branch with export departments.

The international focus is always provided if the business language is a foreign one.

Content of the internship:

Students shall have experience with the following categories in their internship e.g.:

1. Cultural differences between Germany and the country of the internship.
2. Differences in business (e.g. dealing with business partners, employees, leadership styles, preparation for negotiations) or other business activities with an international focus.

Duration of the internship: 2 - 3 weeks.

Insurance coverage: Students are insured by the Students Insurance provided by the school.

Please feel free to contact Ms Illerhaus-Bell at any time before or during the internship.
